

# QD-Series LCD Display 75" | 98"

Size Matters:  
See The Big Picture in 4K

The QD-Series are big. Featuring 4K UHD (3840 x 2160) resolution and multi-screen viewer, it can replace videowalls with its capability of rendering the most delicate details and delivering four full HD screens simultaneously from four different inputs. Coming with durable metal housing and easily shifting between portrait and landscape modes, the QD-Series make a fitting choice for digital signage and videowalls of all specifications tailored to user needs.

## High Reliability

The QD-Series are crafted specifically to transcend the challenge of enduring 24/7 operations. AG Neovo's Anti-Burn-in™ technology also spares them ghosting while performing mission-critical nonstop operations. Metal casing and rigorously selected components not only help do the trick but also keep maintenance easy.

## Unparalleled Visual Quality

The high brightness, high contrast ratio, and black-level alignment deliver an impeccable visual experience. Built on IPS panel with 4 times FHD resolution, the QD-Series render exquisite video quality with motion blur reduction at a refresh rate of up to 120Hz\*.

\* 120Hz refresh rate supported by QD-98 models only

## Easy to Display

The tiling-ready QD-Series can either stand alone replacing videowall set-ups or be arrayed in configurations of up to 10 x 15 videowalls. The QD-Series can also deliver 4K at 60 Hz by single DisplayPort 1.2 cable for the best visual quality.

## Multi-screen Viewer; One display, Four screens

Beyond traditional two-input Picture-by-Picture (PiP) feature, the QD-Series' multi-screen viewer can display up to four full HD screens simultaneously from four different input sources. This advanced feature allows it to replace a typical four monitor setup and delivers four-quadrant viewing at crisp and true Full HD content.

## PID Command & Ctrl Software

PID Command & Ctrl is a software that allows users to control AG Neovo displays via LAN or RS232 connections. It provides a simple and intuitive interface for remote management, OSD-related settings, and easy control on deployed displays. It also can be used to create video walls within minutes and assist system integrators with setting up displays.

## Features
