

ADPRO[®] XO 4 Capabilities in a Low-cost IP Platform

ADPRO iFT™ Gateway XO-enabled NVR+with Full Remote Monitoring

The Affordable Video Monitoring Solution

The iFT Gateway is a member of the ADPRO XO 4 Security+ Operating System enabled product family, and delivers ADPRO reliability and features in a low-cost IP video remote alarm transmission platform. This IP video multi-service platform offers full remote monitoring features such as arming/disarming, event quad pictures with the most reliable and secure transmission of alarms unlike competitive solutions that rely on insecure email transmission of alarms.

Unprecedented Features:

- ADPRO XO 4 features in a low-cost IP video remote alarm transmission platform
- Monitoring, recording, analytics, & transmission on the same platform
- Plug & Play, out of the box operation, lowest total-cost-of-ownership per channel
- Expanded IP camera compatibility list with brand-specific, ONVIF S and generic drivers

- Supports Honeywell Performance, equIP[®], & HDZ series IP cameras
- ADPRO reliability & innovation
 - Up to 4 IP cameras @ 2Mbps
 - Option to add 4 channels of the world's best video content analytics running simultaneously on the same platform
- Pay-as-you-go multi-service analytics:
 - IntrusionTrace: video verified perimeter protection
 - LoiterTrace: video verified detection of unauthorized loitering in indoor & outdoor applications
- 148 inputs and 136 outputs to control building management and security services
- Unbreakable transmission ensures reliable remote connections over any network
- Multi-level response capabilities ranging from 2-way audio talk-down to control of lighting, access, and ventilation or any other building subsystem, all from a remote monitoring station

An ADPRO XO 4 enabled iFT Gateway delivers unprecedented connectivity, detection, verification, transmission, & response capabilities to local retail, residential & remote site applications

ADPRO XO 4 Security+ Operating System Software provides a technology solution to augment or replace human guards with accurate detection – cost effectively and with higher reliability. XO 4 provides live 24/7 unbreakable transmission of very high quality video events to remote monitoring stations, and provides deterrence through multi-level response, including audio, lighting/door controls and first responder dispatch.

*Connect via I/O Modules or camera inputs.

ADPRO iFT Gateway Commissioning Tool

The ADPRO iFT Gateway Commissioning Tool commissions the ADPRO iFT Gateway device quickly and conveniently. Specify the IP address for the device, register and activate its system and IP licenses, and (optionally) add 4 channels of ADPRO Analytics, in a single process and without rebooting. Once the ADPRO iFT Gateway is commissioned, launch the XO Client and start full configuration of the device from this tool.

Please visit www.MyiFTGateway.com.

The XO 4 Enabled iFT Gateway

The XO 4 enabled iFT Gateway offers 4 IP channels of video transmission with the option to easily add 4 channels of ADPRO analytics and event recording via SD card. The XO 4 enabled NVR+ significantly lowers your capital cost per channel and your total-cost-of-ownership with the feature-rich, multi-service capabilities including the world's best intrusion & loitering detection and building management capabilities while providing immediate remote response.

Feature		iFT Gateway
IP Camera Channels		4
IP Channels Configuration		4 IP with option to add 4 Analytics
Embedded Video Content Analytics	IntrusionTrace	✓
	LoiterTrace	✓
Max Storage Capacity		32 GB SD Card (Minimum Required)
USB I/O		20 In / 8 Out*
Network I/O		128 In / 128 Out**

* Via XO I/O Interface USB module.

** Monitored or unmonitored inputs depending on Net I/O unit V2 hardware and V2 firmware combined with minimum XO 4.2 firmware on the controlling ADPRO iFT Gateway device.
