

FMC-05B

Electric Height Adjustable Floor Trolley for Touch Displays Up To 86", 120kg

The trolley offers double columns with extra stability and robustness for working with a touch display. The display can easily be adjusted in height silently & electrically with the remote control. At the backside of the mounting utility, space is reserved for placing a mini PC or thin client.

The stand offers an extra bracket with a VESA of maximum 800 x 600. Product is well accessible with the accessories of the floor lifts (for example five surface solution, soundbar bracket or a compact locking lid can easily be utilized). Besides that, handles are now available for all floor stands with a lift system.

Specifications
